

# Routine Test for 2-hand Macbook 12'

---

Author: Yisong Miao

Time: 17th March 2018

## 1. Serial Number check

---

Directly goto:

```
https://checkcoverage.apple.com/
```

## 2. General Test

---

Go to System Report, Have a scan through each entry. Pay special attention to:

- CPU
- Graph
- dignotics
- memory

## 3. Solid-State-Disk Storage

---

- Go to System Report, Check Between Yisong's and the new one.
- Use software `DriveDX` to do test.

Pay special attention to `host writes` Yisong's index is 20TB. It is reported on Zhihu that when index > 200TB, it may encounter problems.

## 4. I/O

---

USB, Screen, Audio, Keyboard
